

Project Management Using SharePoint

Business Solution

The Challenge:

SharePoint® on-premises and Office 365 offer a wealth of features to help with project management, such as task lists, calendars, and documents. In the office, workers face a disjointed experience, with multiple tools competing for their attention. And vital contextual information is missing, as the user moves from one screen to another. And when workers hit the road, they are completely disconnected from their projects.

Moreover, workers routinely need to reach out to colleagues and partners to collaborate and complete tasks. And while many organizations already have Office 365™, OneDrive for Business™ and Teams, workers do not use these tools effectively for project work, because the experience is completely disconnected from SharePoint document and task management. As a result, despite having a wealth of great tools, projects are becoming increasingly complicated to manage.

harmon.ie to the Rescue:

harmon.ie helps manage projects by keeping workers plugged-in, informed, and up to date. harmon.ie Mobile and harmon.ie Email present users with a single-screen collaboration experience for all their Microsoft collaboration tools, from any device.

Activity Stream

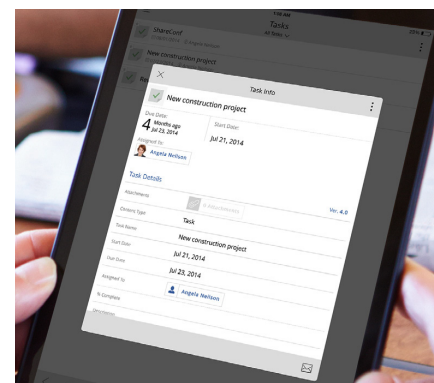

harmon.ie's unique Activity Stream makes it easy to see all project-related updates in real-time, in a single screen. SharePoint document updates, calendar event changes, status updates and new announcements appear instantly in an easy-to-view screen.

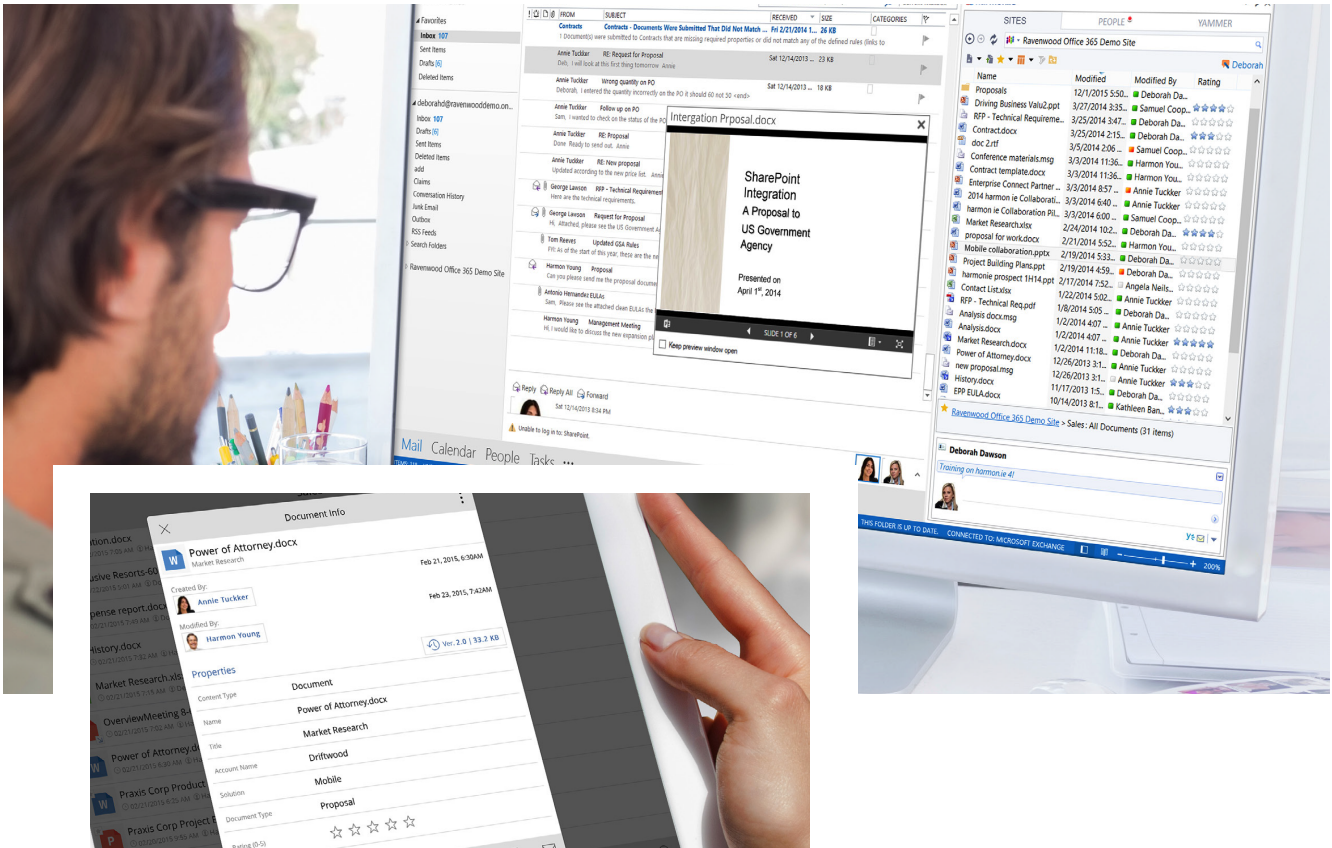

Integration of SharePoint Lists and Documents

harmon.ie provides a 360° view of your project. Lists and document content appear in one contextual user interface. Read, create, and edit directly from mobile and desktop devices. In fact, harmon.ie provides the only way to stay on top of project while out of the office.

Realtime Collaboration

With harmon.ie, it is easy to take immediate action by simply clicking on updates. View and edit documents, update task status, reach out to colleagues, and more...using the Microsoft tools you already have – SharePoint, Office 365, OneDrive for Business, and Teams.

Enterprise-grade Project Management

harmon.ie lets you turn SharePoint/Office 365 into an easy to use project management solution, by providing the following capabilities:

Collaborate and Communicate Documents:

- Share documents and collaborate with team members from the places you spend your work day; Outlook in the office and mobile devices on the go.
- Eliminate document chaos and ensure everyone is working from a single 'source of the truth'.
- Perform real-time collaboration with project team members.

Work Anywhere on any Device:

- Stay in the loop with real-time project activity updates.
- View and edit offline documents from mobile devices, when not connected to the network.
- Attain peace of mind with enterprise-grade security and support from all leading MDM vendors.

About harmon.ie harmon.ie makes it easy for knowledge workers to capture and classify emails and documents to SharePoint and Teams directly from Outlook, the place they already spend their work time. By making it easy to do the right thing, harmon.ie increases SharePoint adoption, workplace productivity, as well as information governance and compliance. That is why thousands of enterprise customers count on harmon.ie's SharePoint and Office 365-based user experience products for email and records management, collaboration, knowledge retention, and SharePoint adoption.

harmon.ie has won numerous Microsoft Best App awards and is a long time Microsoft Partner.
