Bridging the Gap between Outlook & Teams

Yaacov Cohen
harmon.ie CEO

Corey Tinianov
harmon.ie Product Manager

A celebration of collaboration is happening in Teams!

But where are the emails?....

Have you heard any of these before?

When **sharing emails to Teams** we don't get a real email that you can reply to.

How can we add **email attachments** to a Team channel?

There's **no easy way to get the full picture** on an account, project or case: emails in Outlook, chats and documents in Teams

It is so difficult to **find** files in Teams

The experience on Teams is so fragmented! You always need to toggle between Teams and Outlook.

What are your Teams users main pains?

SURVEY

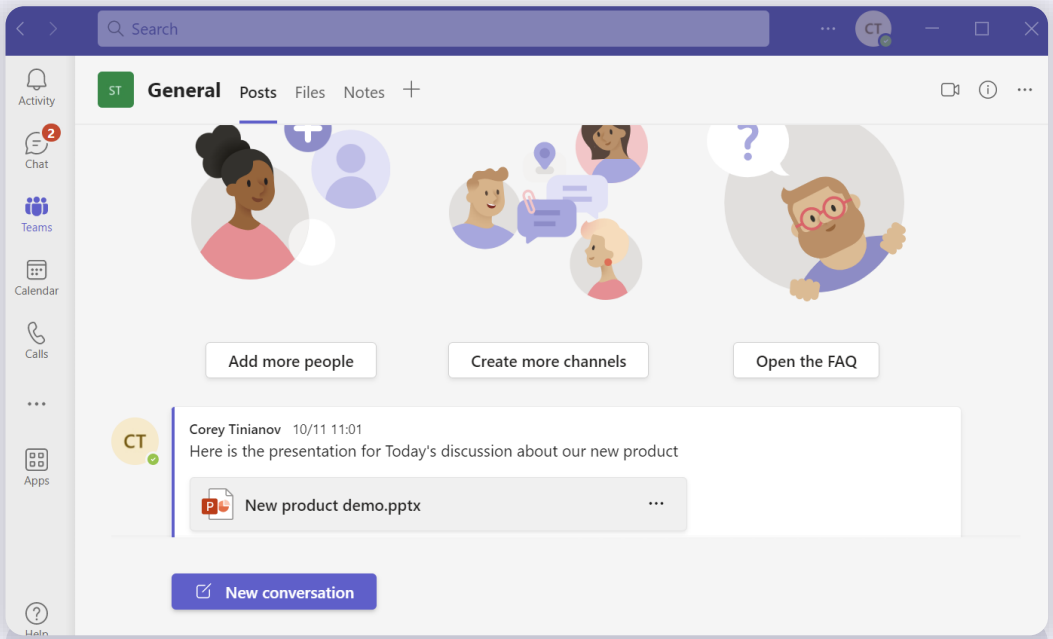
harmon.ie 10

Sharing an email to Teams

- Can’t directly reply to shared email
- No email view (e.g. by Sender)
- Can’t save attachment without the email
- No metadata on emails
- No way to organize shared emails
- No posting and classifying in one flow

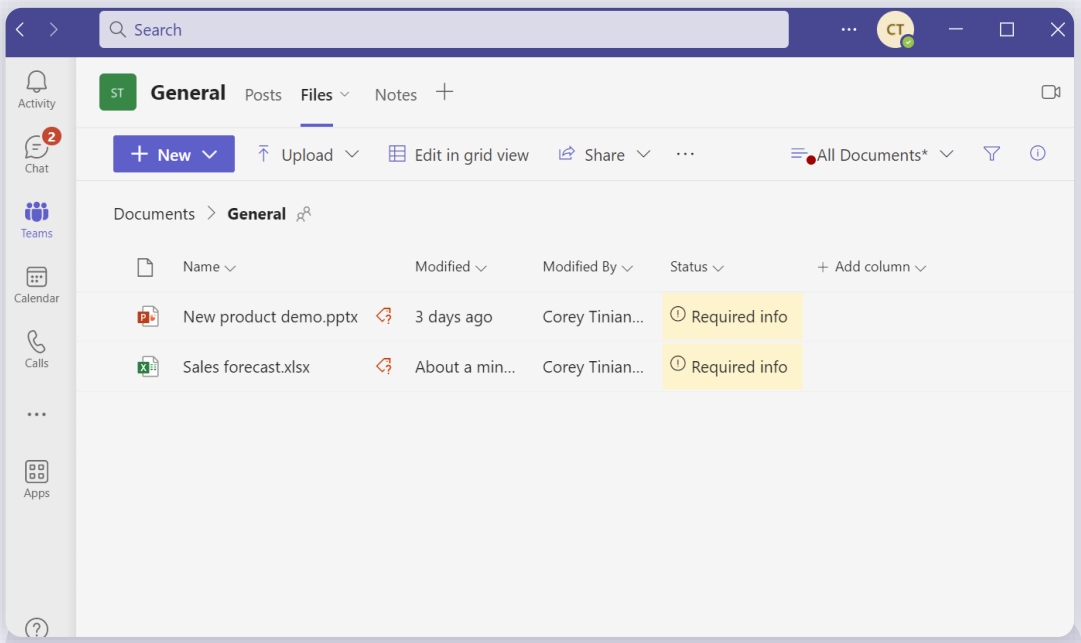
The Teams dilemma: Collaborate or Classify

POSTS TAB



Share in channel, organize later

FILES TAB



Classify in files, share later
